

K9 Interdiction and Detection Services

Who We Are

K9 Interdiction and Detection Services runs handler-led detection dog teams throughout the entire United States, from a base in California’s Central Valley, for schools, government facilities, businesses, event venues, and logistics operations. The dogs are not trained for apprehension, patrol, or protection, and handlers do not search or detain anyone.

Core Competencies

NARCOTICS DETECTION

Illicit-substance odor in vehicles, buildings, lockers, packages, and open areas.

FIREARMS & WEAPONS DETECTION

Firearm and ammunition odor, including gunpowder and black powder.

EXPLOSIVES DETECTION

Explosive and incendiary odor in vehicles, bags, buildings, and venues before doors open.

ONE TEAM, EVERY ODOR GROUP

Every dog is cross-trained across all three above, so one visit screens for all of them.

Coverage and Scheduling

Coverage	The entire United States.
Availability	24 hours a day, by appointment.
Lead Time	Under six hours, depending on distance.
Out-of-Area Work	A two-day minimum engagement.

What You Can Verify Today

K9IDS is a new company and claims no completed engagements. All of this precedes any signature:

- A certificate of insurance, licensing documentation, a W-9, and your completed vendor packet.
- Training and evaluation records for the exact dog and handler assigned to your site.
- A written record of every visit — areas covered, and whether or not the dog signaled.
- A named point of contact who is the same person on every visit.
